

ALOA Board Recommendation

Wednesday 23 October 2013

Response to the draft CPM Repeal documentation released last week

1. Current Prices

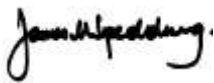

It is recommended that members continue to comply with the carbon price legislation until such time as any repeal takes effect.

2. Future Prices

It is recommended, once the CPM legislation has been repealed and any special conditions clarified, that members comply with those special conditions (including, if necessary, adjusting prices to remove the carbon tax cost).

3. Consequential Adjustments

Depending upon the final drafting of the CPM repeal legislation, and the terms of your customer contracts, there may be consequential issues that require adjustment on a client by client basis. As such it is recommended that no action be taken until the legislation has been finalised and all terms understood.
